Premium Grade Materials

Although we are a young company, our team is equipped with years of experience in Furniture Manufacturing and the Hospitality Industry. We specialize in manufacturing genuine high quality and heavy duty classic wooden and wicker furniture as well as innovative and contemporary stainless steel furniture for Commercial spaces, Resorts, Hotels, Restaurants, Villas and Retail. Most of our manufacturing takes place in Indonesia, except for our Umbrellas which are specially manufactured in South Africa.

Some of our materials listed below:

Plantation Teak Wood

We use first grade plantation grown teakwood (TectonaGrandis), obtained from the most reputable, legal source of timber in Indonesia. Teak is a very stable medium hardwood timber that is resistant to rot making it the first choice for marine and outdoor use over the decades. The high oil content of the teak wood used in our furniture enables it to withstand the harshest weather conditions with minimum maintenance.

Wicker

We use the finest synthetic wicker materials - Viro® and Rehau® - hand-woven over powder-coated aluminum or wooden frames to produce splendid furniture that is strong, color fast and entirely resistant to the elements of weather. Viro and Rehau are both PE based industry-standard durable synthetic rattans that come in various shapes, colors and textures. Our experienced weavers are able to weave natural rattan as well as rattan into various textures and shapes.

RAUCORD is a premium synthetic weaving material suitable for all kinds of applications including outdoor and indoor furniture as well as garden and home accessories.

The material is manufactured using renowned German engineering know-how and production technology. REHAU has been active in polymer processing since 1948 and is one of the pioneers in designing and supplying all-weather rattan with over ten years of experience in this field.

Due to its superior characteristics, RAUCORD weaving material offers a carefree outdoor experience.

Warranty: 5 years on Rehau Material

Virofiber the global producer of environmentally friendly all weather wicker for medium and high end markets. Viro has recently introduced a new series of flexible fibers called Flexo which is a flexible “rubbery-like” fiber that is easy to weave. Flexo still maintains all the benefits of all-weather, durable synthetic wicker; 100% recyclable, non-toxic, weather resistant, won’t fade, crack or peel. The wide surface has a subtle leather texture which adds style to any outdoor application.

Warranty: 2 years on Virofiber
